DETAILED ACTION

Election/Restrictions

1. Applicant's election of group 2 in the reply filed on 5/27/08 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 1. Determining the scope and contents of the prior art.
 2. Ascertaining the differences between the prior art and the claims at issue.

Art Unit: 1625

3. Resolving the level of ordinary skill in the pertinent art.
 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
5. Claims 15-26 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kawai US Patent 5798383..

Kawai teaches a markush of

1. A compound of formula (I):

wherein

Ar is selected from the group consisting of:

(b) furyl, benzo[b]furyl, thienyl, benzo[b]thienyl, pyridyl and quinolyl, optionally substituted with one to three substituents selected from C₁₋₄ alkyl, C₁₋₄

X is selected from C₁₋₄ alkylene, C₂₋₄ alkenylene, —(CHR¹)_m—Q¹—(CHR²)_n—, —O(CHR¹)_j—Q²— and —(CHR¹)_j—O—N= in which the N= moiety is attached to the cycloalkene ring; and in which Q¹ is O, S, SO, SO₂, NR³, CH=N—O or CO, Q² is O, S, SO, SO₂ or NR³, and R¹, R² and R³ are each hydrogen or C₁₋₄ alkyl, m and n are each an integer from 0 to 4 and j is an integer from 1 to 4;

p is an integer of 1 or 2;

Y is hydrogen, C₁₋₄ alkyl, C₁₋₄ haloalkyl, C₁₋₄ alkoxy, C₂₋₄ alkoxyalkyl, C₁₋₄ alkylthio, hydroxy, halo, cyano or amino;

Z is hydrogen or C₁₋₄ alkyl; and

M is hydrogen, a pharmaceutically acceptable cation or a pharmaceutically acceptable metabolically cleavable group.

This markush encompasses the instantly claimed compounds.

The difference between the instant compounds and the compounds taught by Kawai is that Kawai does not make any compounds that directly read on the instant claims. However, the markush of Kawai encompasses the instant claims.

It would have been obvious to one of ordinary skill in the art to make a different compound falling within the scope of the markush taught by Kawai with the reasonable

expectation of getting a compound having pharmaceutical activity. Rationale: The claim would have been obvious because "a person of ordinary skill has good reason to pursue the known options within his or her technical grasp. If this leads to the anticipated success, it is likely the product not of innovation but of ordinary skill and common sense.
